

To the attention of “**China Mobile**”

This is to confirm that **Avea İletişim Hizmetleri A.Ş.** has made a trial of “Thermazone” painting product from “Thermozone Europe Ltd.” in a base station container in Fall 2008.

With mid day outdoor temperature of max 24 degrees Celcius versus mid night temperature of min 17 degrees Celcius, it has been observed that the application has accomplished **14%** energy saving over the total budget of base station power supply and air conditioner unit. The traffic figure of the subject base station was stable over the measurement period before and after the application.
